

PCISBIO Day @ ITQB-NOVA

Abstract:

Instruct-ERIC: Past successes and new beginnings

Susan Daenke, Instruct Hub Coordinator

Instruct-ERIC, one year from its launch, is celebrating successful outcomes from its access programme, pilot awards and internships. New methods and facilities are being added to the Instruct infrastructure and a new way of funding access is on the way. Examples of these success stories will be presented with an overview of the changes that are expanding both Instruct membership and the infrastructure available to users. A brief summary of Instruct's role in other H2020 projects will give an indication of Instruct's impact in European science. Planning and involvement in the last generation of H2020 projects – leading to Horizon Europe, is underway and a projection of the Instruct priority areas for the future will be given.
