

P1. Tau Protein: Enhancement and Inhibition of Aggregation

Elias Akoury

P2. Gd(III) Chelates as NMR Probes of Protein-Protein Interactions.

Case Study: Rubredoxin and Cytochrome c3

Rui Almeida

P3. Influence of fibrillization conditions on the structural heterogeneity and polymorphism exhibited by

Alpha-synuclein

Santhosh Ayalur Karunakaran

P4. NMR on a paramagnetic ionic liquid

Isabel B. Coutinho

P5. Orientation and Depth of Surfactant Protein B C-terminal Helix in Lung Surfactant Bilayers

Philippe Bertani

P6. Improved ^2H rf pulse performance and ^2H - ^{13}C cross polarization combined with multiple acquisition methods in solid-state NMR

Morten Bjerring

P7. Solid-state NMR methods for the extracellular matrix

Wing Ying Chow

P8. Probing Structural polymorphism of cyclic-nucleotide binding domain by solid-state NMR

Abhishek Cukkemane

P9. Therapeutic strategies about the Alzheimer's disease

Helene Eury

P10. Study of the dissolution and the structure of the transmembrane domain of the 4 subunit of mitochondrial ATP synthase

Floreal Figeac

P11. NMR structural studies of the human SOUL

Filipe Freire

P12. A Smad action turnover switch operated by WW domain readers of a phosphoserine code

Nina Goerner

P13. PDBe Vivaldi and NMR Resources at PDBe

Pieter Hendrickx

P14. An antiplasmodial flavone from the stem of Tephrosia Purpurea

Wanyama Peter Juma

P15. Integration of COSMOS into CCPN - Evaluating Protein Models with Computed Chemical Shifts

Konstantin Klenin

P16. Biophysical studies of a new peptide from Helicobacter Pylori with antimicrobial properties

Dursun Korkut

- P17. NMR Studies on the CLD of the ABC transporter HlyB from *E. coli*
Justin Lecher
- P18. Locked tether structure connects Rna14p and Rna15p within the yeast CF IA complex
Cameron Mackereth
- P19. High Resolution Solid-State NMR Study of Amyloid-Beta 1-40 fibrils
Jiafei Mao
- P20. NMR solution study of the RhoGAP domain of the protein Rgd1
Denis Martinez
- P21. Screening expression and purification conditions for toxin B-subunits that cause diarrhea
Malgorzata Palczweska
- P22. Protein-protein interactions and Protein assisted cluster biosynthesis studied by NMR
Sofia Pauleta
- P23. NMR investigation of the *Bacillus Subtilis* morphogenic factor RodZ
Ana Catarina Pereira
- P24. Two component system involved in copper resistance in *Marinobacter hydrocarbonoclasticus*
Cecília Pinto
- P25. Structural studies of the mammalian end-binding protein 3 employing high-resolution solid-state MAS NMR
Mariana Sardo
- P26. Protein-Protein and RNA-Protein complexes by solution NMR
Constanze Schelhorn
- P27. NMR solution structure of the ovine prion-like (Doppel) protein N-terminal Sequence (1-30)
Rui Soares
- P28. The Influence of Temperature and Binding on the Dynamics of CtCBM11
Aldino Viegas
- P29. Investigation of a novel bacterial Iron homeostasis pathway
Vanessa Vieira
- P30. NMR studies of Ste5 protein – major component of the pheromone signal transduction pathway in yeast
Michal Walczak
