

PAW 2023

Postdoc Appreciation Week
(18-22th September)

The **Postdoc Appreciation Week (PAW)** started in 2009 in USA to acknowledge the significant contributions that postdocs make to research, discovery and outreach activities.

Nowadays this event is celebrated in other countries (e.g. UK, Germany) and we aim to bring this tradition also to Portugal, starting with ITQB and iBET communities.

Thus, we have prepared a special program with interesting topics and hands-on sessions for our communities.
