

Lígia M. Saraiva
Molecular Genetics of Microbial Resistance Laboratory
ITQB
FCUL- 2009

1. Tema do projecto - **Study of pathogen resistance to antimicrobial action of the human immune system**
2. Orientadora – **Lígia M. Saraiva** E-mail: lst@itqb.unl.pt
3. Plano do projecto - Pathogenic microbes are able to resist host defences, in particular, the antimicrobial actions of reactive oxygen and nitrogen species generated by the human immune system. This project aims to elucidate and study the gene involved in the resistance of pathogens with impact in human health.
4. Duração aproximada - 8 meses a 1 ano.
5. Local de Realização – ITQB, Av. República (EAN), 2780-156 Oeiras.
6. Número de alunos por projecto - 2
