

Instituto de Tecnologia Química e Biológica
BI research fellowship
Projecto PTDC/AGR-AAM/102345/2008

We seek a BI (Bolsa de Investigação) fellow to work on the FCT project "Breaking Down The Wall - Microbial Hemicellulases for saccharification" (Ref. PTDC/AGR-AAM/102345/2008 from Fundação para a Ciência e a Tecnologia).

Duration: Six months fellowship (renewable), starting March 1st, 2011. Employment regulations can be found in (<http://www.fct.mctes.pt/pt/apoios/formacao/ambitoprojectos>).

Scientific area of the work: Structural biology

Places of work: Structural Genomics Laboratory and Protein Modelling Laboratory.

Supervision: Doctor Isabel Bento and Professor Cláudio M. Soares.

Academic background: Licenciatura (pré-Bolonha), Master Students, or Masters in Biochemistry, Chemistry, Biology and related areas. The average mark of licenciatura should be above or equal to 15 (or comparable).

Outros Requisitos:

- Strong motivation for research and good work capabilities.
- Motivation to work on Structural Biology.
- Good working knowledge of the English language.

Pay: According to the rules of FCT concerning BI fellowships.

Application documents: Send your application (stating the reference of the fellowship) with a detailed CV (including individual marks in the different courses of your degrees), a motivation letter and the name of two references.

More information about this Project and about the labs involved can be found in:
