

RM ROADMAP

Creating Framework Conditions for Research Management to Strengthen the European Research Area

About RM Roadmap

EARMA is delivering an important project that will support the strengthening of an inclusive research management community in Europe. Working with our partners, RM Roadmap will chart a course for the future of research management (RM) in Europe and a community to support its delivery. It will be conducted over 36 months and is funded to the amount of €1.5m.

The overarching objective of RM Roadmap is to identify and adapt the research management capital base of the EU, including the widening countries, and emerging needs of its current and future research management workforce to improve the EU's competitiveness and sustain its economic performance.

RM Roadmap will allow existing European networks to connect on a smart community platform which will enable an unprecedented consultation process in research management in the world. This co-creation process will gather the existing communities and expand upon them to reach two main objectives - To create and inform a bottom-up consensus on the future of RM in a roadmap, and to inform the community about existing training, networking, funding, and career mobility opportunities.

Eight partners are working together on this exciting project: European Association of Research Managers and Administrators (Belgium); HETFAs Research Institute (Hungary); Nova University Lisbon (Portugal); Association of European Science & Technology Transfer Professionals (Netherlands); Crowdhelix Limited (Ireland), The Cyprus Institute (Cyprus) and associated partners Janssen Pharmaceuticals (J&J) and Una Europa (Belgium).

The success of this project will be determined by the involvement of the entire research management community. That is why we are encouraging research support professionals of all levels to participate in RM Roadmap. Join us, share your views and work with us to shape the future of the research management profession in Europe.
